

Thank you for downloading the Shapets asset pack!

You're invited to create your own Shapet or share a moment with your kids, friends, or loved ones. The possibilities are endless—feel free to explore and design however you like! The only thing to keep in mind is the semicircle shape, which all Shapets are born from. Without it, they wouldn't exist! But don't worry, it's just a starting point—let your creativity take over!

In this pack, you'll find everything you need: the sketch of Shapy, its vectorized version, and the semicircle shape as a separate file. You'll also get the color palette that all Shapets use, though feel free to experiment with your own colors!

I'd love to see what you come up with! Feel free to share your creations with me on my X profile (@tormius).

A stylized, handwritten signature in black ink that reads "Tormius". The signature is fluid and cursive, with a long horizontal stroke extending to the left.
